

Gene expression studies on physiological dormancy in *Arabidopsis thaliana* seeds

Peter Toorop, Molecular Biologist

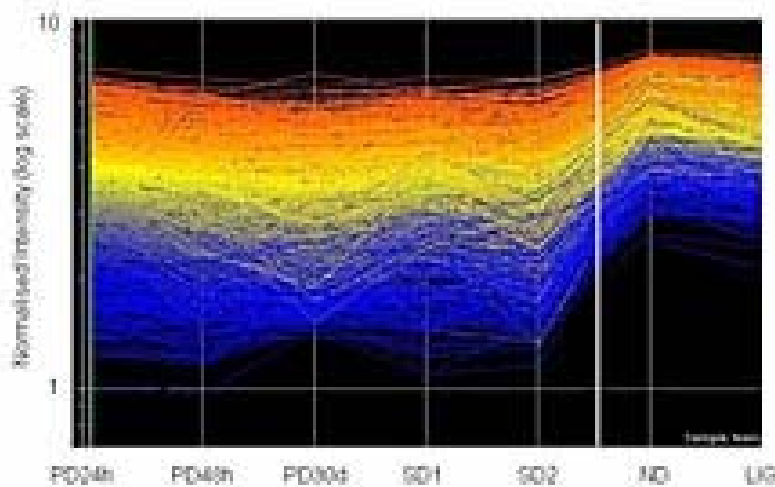

Royal Botanic Gardens, Kew:

Millennium Seed Bank Project

Thursday, May 10, 2007

4:30 PM Lecture

Pancoe 3103, 2200 Campus Drive

Expression of 779 germination-associated genes in seeds of *Arabidopsis thaliana*, that are physiologically dormant (PD24h, PD48h, PD30d, SD1, SD2) or close to completion of germination (ND, LIG).
